CONTROL

D = -2/3 A = 2/3 T = 1/3

Price and borrowing cost foregrounded

FULL RESPONSE

You've got two different ways to spread the cost of a large purchase:

- Juniper Vale 18-month instalment plan: this has a £40 setup fee and a 7.9% instalment APR.
- Ember 18-month zero-interest purchase card: this charges 0% for 18 months on the purchase.

So the key difference is that Juniper Vale includes a setup fee plus instalment APR, while Ember gives an 18-month 0% period on the purchase.

Convenience and predictability foregrounded

FULL RESPONSE

If you want a straightforward way to spread the cost, Juniper Vale's 18-month instalment plan can be activated on your existing account with no new application. It also splits the balance into 18 fixed instalments, which can make repayments more predictable month to month.
